Automating Financial Reporting with Power BI for Alpha Bank

ALPHA BANK

Industry

Banking, Financial Services

Technologies

Power BI, Bloomberg Integration, Excel

Business gains

90%+ reduction in Manual Effort

80% Faster Reporting Generation

100% Accuracy Improvement

Summary

Cloud Fusion Global implemented a customized Power BI solution for Alpha Bank, completely transforming their financial reporting process. The solution automated data extraction from Bloomberg and Excel, reduced manual reporting effort, and provided real-time, interactive financial insights. This implementation allowed **Eleni Syraki, Asset & Liability Manager**, to deliver dynamic and accurate reports to decision-makers with minimal effort.

About Our Customer

Alpha Bank is a leading financial institution providing a range of banking and investment services. **Eleni Syraki, Asset & Liability Manager at Alpha Bank**, was responsible for preparing and presenting financial reports for upper management on a **daily and weekly basis**. Her reports were manually created in **Excel and PowerPoint**, requiring time-intensive data extraction from **Bloomberg** and manual formatting. Eleni partnered with **Cloud Fusion Global** to modernize

this process with an **automated Power BI reporting system** that reduced inefficiencies and improved decision-making.

Business Challenge

Eleni faced significant challenges in financial reporting:

- **Manual Report Creation:** She manually compiled financial data in **Excel and PowerPoint** before sharing it with upper management.
- **Time-Consuming Process:** Hours were spent daily extracting, formatting, and updating reports.
- **Data Inaccuracy Risks:** Manual handling increased the likelihood of errors in calculations and data representation.
- **Lack of Real-Time Insights:** Reports provided static snapshots of financial data rather than real-time updates.
- **Manual Report Distribution:** Reports had to be manually emailed to decision-makers, delaying access to critical financial information.

To eliminate these inefficiencies, **Eleni partnered with Cloud Fusion Global** to implement an **automated Power BI solution**.

Solution Provided

Cloud Fusion Global developed a **fully automated, interactive financial reporting system** using Power BI, integrated with Bloomberg and Excel. The key features of the solution include:

- **Online Power BI Dashboards**
 - Transformed static Excel/PowerPoint reports into interactive, real-time dashboards.
 - Provided centralized access for decision-makers across Alpha Bank.
- **Automated Data Integration**
 - Seamlessly connected Power BI with Bloomberg and Excel for live data updates.
 - Eliminated the need for manual data extraction and entry.
 - Configured automatic refresh schedules, ensuring reports always reflect the latest financial metrics.
- **Dynamic & Visual Reporting**

- Created customized financial dashboards with bar charts, trend graphs, KPIs, and interactive filtering.
 - Enabled drill-down analysis for detailed financial performance tracking.
 - Provided user-friendly navigation, enabling Eleni to customize reports effortlessly.
- **Instant Report Sharing & Distribution**
 - Eliminated manual email distribution by providing secure online access to reports.
 - Decision-makers could access reports anytime from desktop, tablet, or mobile devices.
 - **Custom Filtering & Advanced Analytics**
 - Allowed users to filter data by period, financial metrics, and risk categories.
 - Integrated forecasting tools and variance analysis for improved financial planning.

Key Outcomes

- **80% Faster Report Generation** - Data analysis time reduced from hours to minutes.
- **90% Reduction in Manual Effort** - Eliminated the need for manual report preparation.
- **Real-Time Reporting** - Financial reports update instantly, eliminating data lag.
- **100% Accuracy Improvement** - Automated data handling removed human errors.
- **Enhanced Report Accessibility** - Upper management receives reports instantly via an online Power BI dashboard.
- **Scalability & Future Expansion** - The solution can be extended to other financial reporting needs.

Conclusion

With **Cloud Fusion Global's** Power BI solution, **Eleni successfully automated** its financial reporting process. Eleni Syraki can now focus on **financial analysis and decision-making** instead of spending hours on manual report creation. The transition to **real-time, automated reporting** has enhanced transparency, accuracy, and operational efficiency, ensuring a more streamlined and impactful financial reporting process.

Eleni Syraki, Asset & Liability Manager at Alpha Bank, says:

I had the pleasure of working with Cloud Fusion Global on several projects, including Power BI dashboards and other IT-related tasks, and I couldn't be more satisfied with their services. Their team demonstrated exceptional technical expertise, professionalism, and a keen understanding of our requirements.

They delivered high-quality solutions on time and were always responsive to our needs. The Power BI dashboards they developed provided us with valuable insights and significantly improved our data visualization and decision-making processes.

I highly recommend Cloud Fusion Global for their outstanding IT services and look forward to collaborating with them again in the future.
